

## 14. Movie Night

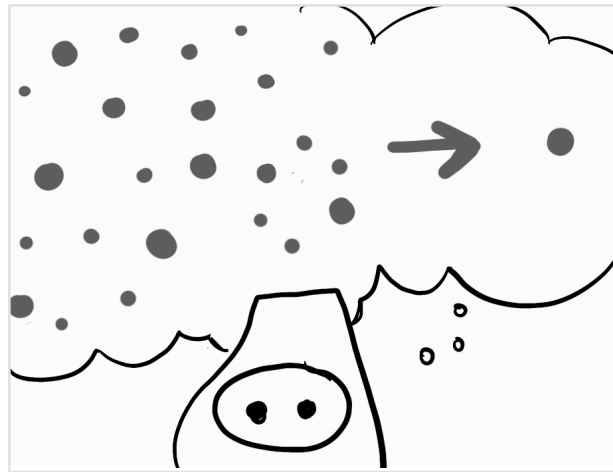

Timmy and Tammy, two siblings, and their next door neighbor, Alan, can't decide what movie to watch this afternoon.

Timmy asks The Agent to make a recommendation based on their previous watch histories.

The Agent looks at Timmy and Tammy's watch histories across Netflix, Hulu, and YouTube, and also fetches Alan's history from the Agent in his home.

Then, it optimizes a recommendation that all three of them are likely to enjoy.
