

04. Buying Gift for Dad

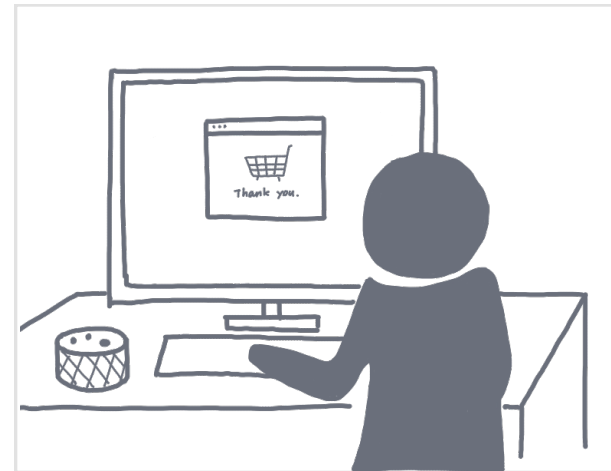

Dad's birthday is coming up and Jeffrey, his younger son, doesn't know what to get him.

He asks the agent if it can recommend a birthday gift based on his dad's browsing history and social media.

The agent searches his dad's browsing history on YouTube, Facebook and other sites.

Using the information, but without exposing Dad's exact history and social media information, it gives recommendations. Jeffrey gets his dad a birthday gift.
